---

#### STARTING DATE [for the next school year]

September 2014

---

#### ENDING DATE [for the next school year]

June 2015

---

#### TYPE OF TEACHING

face-to-face

---

---

### DESCRIPTION

The demand of professionals for specific activities is increasing in the current world. So, the creation of an upper level vocational training degree to qualify high level specialists who can work collaboratively, or employees , either developing projects designed by higher levels or running their own work at this level [design isolated elements, simple works , minor remodeling, etc.].

For this reason, bachelors should possess the knowledge to enable them for formal performance with specific responsibilities in the field of designing and planning, management and construction management. These skills include a basic cultural background, the artistic expression capability that allows them to manage their imagination and creativity, and having technology knowledge in which they could base their projects.

The purpose of these studies is to train high level technicians in Project Management and Decorative Works Management.
