face-to-face

DESCRIPTION

The private and public work-oriented fields demand for an upper-level degree in sculpture applied arts which comprises a wide range of artistic and professional possibilities defined by the variety of workshops, techniques, procedures and materials for the creation of tridimensional objects with a practical, creative and cultural function.

Nowadays, it is necessary to purify these long-lasting traditional professions and provide them with new technologies and contemporary tools to make them remarkable in the artistic creation. This level's technicians should possess an appropriated cultural background, particularly in relation to the fundamentals of the artistic expression and the forms of representation which enhance their creative capacity and practical fulfillment.

SCULPTURE HLSC
